She Did It, You Can, Too

Hillcrest High School, Texas

Topic: Encouraging Girls in Math and Science

Practice: Female Role Models

The walls in Hillcrest High School are decorated with a series of motivational posters, showing former students of the district in high school and today. The purpose of the posters is to show students that others they can identify with attained great careers, and they can do it too. One poster shows a former student who is now Chairman and Chief Executive Officer of Carver Federal Savings Bank. A second poster shows a former student who has received full scholarship from Harvard University. The posters include a link to a website that provides further information about courses students need to take to prepare for college, college entrance exams, scholarship opportunities, and career counseling.
